

DATE: August 15, 2008

TO: Watco Team

FROM: Joe Keys
Plant Manager, Fitzgerald GA

SUBJECT: Safety & Environmental Manager, Watco Mechanical, Fitzgerald, GA

I am pleased to announce John Streat, Jr. has accepted the position of Safety and Environmental Manager for the mechanical shop in Fitzgerald, Georgia.

In this position, John will be responsible for the overall safety program at Fitzgerald and will work with local and field team members to develop, implement and measure applicable safety rules and programs.

Before joining the Watco Team, John worked for Pace American where he worked in sales. Prior to that John was the Safety Coordinator for Elixir Industries where his responsibilities included safety oversight and training. His efforts in training and his implementations of safety programs lead to significant reductions in recordable and loss time injuries. John attended Georgia Tech where he was awarded a diploma in industrial safety.

We are fortunate to add John to the Fitzgerald, GA team and feel confident he will bring an added focus to safety. Our safety was formally the responsibility of Brian Clark who also oversaw Quality Assurance. With the addition of John, Brian will be able to focus exclusively on quality and will fill the role of Quality Assurance Manager.

John is a native to Fitzgerald and is a Desert Storm veteran. He and his wife Lisa have three daughters; Grace, 7; Mary Claire, 6; and Anna, 4.

John can be contacted at 229-423-5651 or at jstreat@watcocompanies.com .

Please join me in welcoming John to the Watco Team and wishing him great success.
